“RHESUS MACAQUES CAN BE EFFECTIVELY INFECTED WITH SARS-COV-2 VIA OCULAR CONJUNCTIVAL ROUTE.”

—BIORXIV

The design is completely closed and airproaf.

The face engineering design ensures that the goggles fit perfectly on the face and isolate the virus from eye infections.

ANTIFOGGING

Photo of medical goggles without anti-fog function

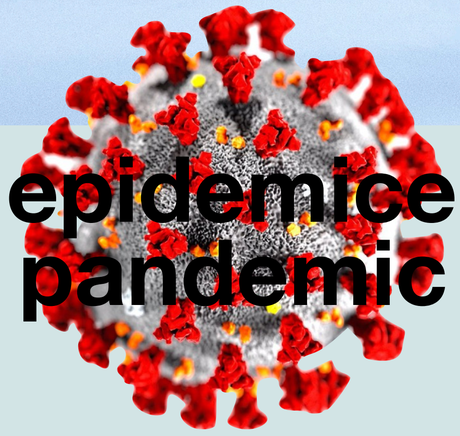
Anti-fog coating on the lens to ensure that working vision is not affected

MEDICAL GOGGLES

160° wide Vision

True fully enclosed

- Anti-fogging
- Anti-impact
- Anti-dust
- Sign perspective rate
- Anti-droplet
- Anti-wide sand
- Anti-splash
- Chemical resistant



SARS-COV-2

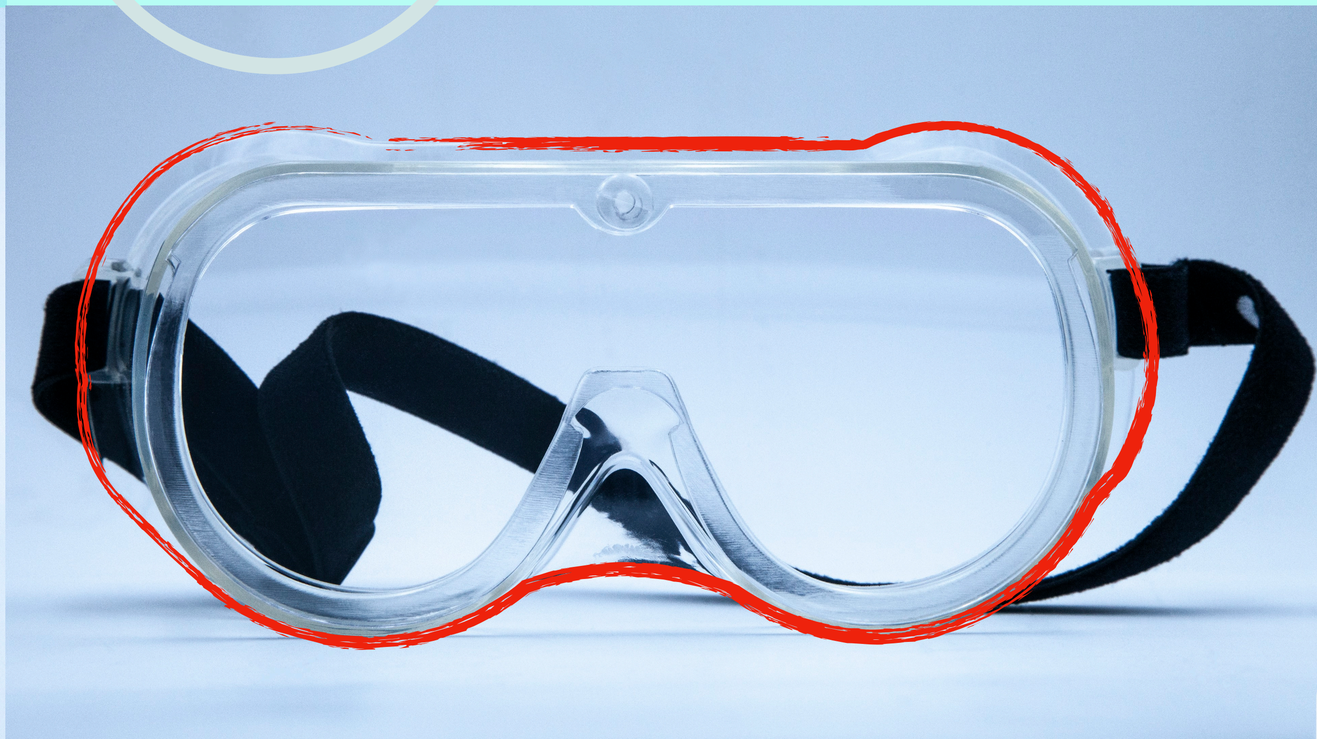
Droplet transmission
Aerosol transmission

Sign Definition Clear Lens

160-degree wide and clear lenses ensure the vision, prevent distortion or deformation of objects.

No Air Valve Design

No air valve design to ensure that the space inside the goggles is isolated.

Full Fit Design


The design of the bezel fully fits the curve of the face to ensure that the space inside the goggles is isolated.
